MR. PARNELL'S POSITION.

The course which Mr. PARNELL may a splendid record in the past for his guid- go Democratic. ance, has become publicly smirehed with scandal of a particularly malodorous char-

There are several questions involved the Will Mr. PARNELL's continued leadership of the party result to the benefit or detriment of the Irish cause?

Some of the most able men in the party are very strongly convinced that Mr. Pan-NELL's continuance in the leadership will delay for years the accomplishment of is not gone. Ireland's aims. The contention of Ireland is one that involves principles, and an unprincipled man is not the one to hold the Irish helm, if for no other reason than that the people will be strongly disaffected towards him. There are others in the party capable of leading it with brill-

It would certainly redound to Mr. Pan-NELL's credit if he showed a disposition to retire in the face of such strong aversion among his own party. Then, if the popular centiment insists on his remaining, a different complexion is given to the question.

WINTER PRUIT.

THE EVENING WORLD'S Christmas Tree will be as heavily laden with choice fruit as any Summer or Autumnal fruit tree. The corps of gardeners which attends to the Tree, spading, nourishing and watering it. is large and works industriously. In a Christmas Tree, where care like this is be stowed, it is impossible that there should be a failure of the crop.

And there will not be ! Only, there are a great many poor children, and there cannot be too large a crop. So, again, kind readers, let your hand go down into your pocket, and come up with something for the Tree in it. Money, presents, personal assistance, all are in order, and will be well placed when they are devoted to the rearing of this gracious Tree.

Be generous and prompt.

RESPONSIBILITY.

When three thousand spectators of game are flung to the ground by the collapse of a stand erected to support more than that number of persons, the matter should be vigorously investigated to see if place it where it belongs in case there be. No one was killed, and the injuries in-

flicted were not of the most serious character. But this has nothing to do with the matter. Dozens might have been killed. Such structures should be officially in spected and vouched for by mechanical experts. Then on them devolves the respon

sibility.

With news of depredations by the Sioux Indians comes the assertion of whites officially connected with the Indians, that there is little prospect of hostilities. These assertions are apparently well grounded but proper precautions should certainly be taken in the matter. The religious phase is the most stimulat

ing one with the Indians. The frenzied ghost dance is an indication of how they are affected, and religious excitements are very blinding and at times perversive. Be ready for them if they break out. This is only hard common sense.

A TRIAL TRIP.

The Sing Sing dynamo has been tested on a horse. The animal was killed instantly and, in the opinion of electrical experts who were present, painlessly. If the same cur rent is applied to Murderer Wood the result ought to be the same.

Fifteen hundred volts were sent through the horse, and a man certainly should not have greater resistence to the current than so much larger an animal. Warden Brush is going about the preparations with great care. He doesn't want a Sing Sing bungle added to the Auburn horror.

If the press had not been represented at the KEMMLER execution and the witnesses had kept quiet the public would never have known the horrors of this torture. The public has a right to know how a second experiment turns out. Yet Warden Bausa thinks he cannot let any newspaper men witness the affair. Wrong.

Representative DUNNELL, of Minnesota, Chairman of the House Committee on Census, says he has not the slightest idea that the census was unfair to New York, and is determined to fight against a recount Mr. DUNNELL should consider carefully before doing anything rash.
